**Subject:** [External] SUBJECT: Dominion Energy Proposed Rate Hike

With regard to the proposed rate hike by Dominion Energy, please know that, for the record, I **object** to it. Dominion management should take a hard look at how they allocate and spend revenue. A rate increase could **not** come at a worse time. With all the issues people are experiencing in light of the pandemic and with consumer goods prices continually rising due to world events, their timing in asking for a rate increase is appalling and smacks of greed, arrogance, and a complete disregard to their customer base.

For all the whining these people do, it would be wise if they were to **allocate the monies they waste each month on those unwanted, ridiculous energy usage reports they mail out and apply that money to other expenses**. Not only are these usage reports **unwanted**, they come in an entirely separate envelope from monthly billing statements **thereby spending and wasting extra money on a monthly basis on additional postage, as previously pointed out**. What an utterly stupid waste of money. I have enough intelligence to monitor and regulate my own usage without some arrogant entity sending me wasting garbage each month.

I am cautiously optimistic and hopeful that the comments the PSC is getting from folks will resonate instead of falling onto deaf ears. **Vote no to the proposed rate increase.**

Sincerely,

C. J. Salvo
